

## Trex HVAC's Counterflow Heat Recovery Exchangers Receive Eurovent Certification

The **Counterflow Heat Recovery Exchangers**, developed by Trex HVAC and produced for the first time in Turkey, have successfully received the **Eurovent Certification** following extensive testing and verification processes.

TREX HEAT EXCHANGERS

### Counterflow Heat Exchanger CN

Verified by Eurovent

The product, which was first introduced to the industry at the **ISK-SODEX 2025 Exhibition** held at the Istanbul Expo Center between **22–25 October 2025**, quickly attracted attention both domestically and internationally. Eurovent certification confirms that the product performance complies with international standards, strengthening Trex HVAC's commitment to quality and reliability.

#### High-Efficiency Counterflow Design

With over **20 years of industry experience**, Trex HVAC's Counterflow Heat Recovery Exchangers enable users to achieve **energy savings of up to 90%**.

These exchangers can be used in heat recovery ventilation systems for:

- Residential buildings
- Commercial buildings
- Public buildings

The products contribute to sustainable building applications with their compliance with **European Union regulations and Ecodesign (ErP) requirements**.

## “Eurovent Certification Is a Major Milestone in Our Global Journey”

Trex HVAC **Co-Founder Deniz Zeybel** commented on the certification process: “Receiving the Eurovent Certification for our Counterflow Heat Recovery Exchangers, which are produced in Turkey for the first time, not only validates the performance of our product but also confirms our engineering infrastructure and quality standards at an international level. We consider this certification a strong step forward in our global growth strategy.”

## First International Showcase: MCE 2026

In line with its globalization vision, Trex HVAC will participate in its first major international event of 2026.

The company will exhibit at the **Mostra Convegno Expocomfort (MCE) 2026**

**Exhibition** in Milan between **24–27 March 2026** at: **Hall 9 – Stand T04.**

**TREX**  
Heat Exchangers

**HALL 9**  
**Stand No: T04**

Trex HVAC aims to strengthen its position in the European market by presenting its Eurovent-certified counterflow heat exchangers and innovations in energy efficiency and ventilation technologies to international visitors.

### **About Trex HVAC**

With more than 20 years of industry experience, Trex HVAC develops energy-efficient heat recovery solutions, contributing to sustainable and environmentally friendly building technologies.

With its high-performance products and commitment to international certification processes, the company continues to expand both in local and global markets.
